Res Mechanica **20** (1987) 379–380

CONTENTS OF VOLUME 20

Number 1

An Approximate General Method for the Design of Helical Slender Beams of Rectangular Sections 1
G. D. STEFANOU (Greece)

On The Creep Deformation, Bulge Behaviour and Failure of Zircaloy Tubes . 33
V. K. ARYA (India)

Application of Double-Exposure Speckle Photography and Some Numerical Methods to the Solution of Elastoplastic Problems 53
LUBEN HADJIKOV, VASIL KAVARDJIKOV, VARBINKA VALEVA and PAVLINA BEKIAROVA (Bulgaria)

Fatigue Crack Growth Behaviour of 2¼Cr1Mo Steel Tube at Elevated Temperature 73
J. H. BULLOCH (South Africa) and L. W. BUCHANAN (Scotland)

Number 2

Evaluations on Power Ramp Data of PWR Fuels by FROST and THERMOST Codes 97
K. MURAI, S. OGAWA, H. NUNO and Y. KONDO (Japan)

Integration of Constitutive Equations of Hardening Material 113
WANG XU-CHENG and CHANG LIANG-MING (People's Republic of China)

The Effect of Temperature on Strain-ageing in Silver Chloride 127
M. T. SPRACKLING and H. SHALITT (Great Britain)

Pressure-fatigue Testing of 2¼Cr 1 Mo Steel Tube at Elevated Temperature . . 143
J. H. BULLOCH (South Africa) and A. A. P. SUMMERS (Scotland)

Estimation of Errors in Torsion Testing 163
H. KOBAYASHI and B. DODD (Great Britain)

Notch Root Stress/Strain Prediction for Elastic–Plastic Loading 177
F. ELLYIN and D. KUJAWSKI (Canada)

Announcements 191

Res Mechanica (**20**) (1986)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Northern Ireland

Number 3

Theoretical and Experimental Study of Creep Behaviour for Reinforced and Prestressed Concrete Portals 195
G. D. STEFANOU (Greece)

Effects of Crystallographic Orientation on Plastic Deformation and SCC Initiation in Zirconium Alloys 217
T. KUBO, Y. WAKASHIMA, K. AMANO and M. NAGAI (Japan)

Un Modèle de Réponse en Viscoélasticité Non-linéaire de Matériaux 235
Y. M. HADDAD (Canada)

Estimation of the Variability of Temperature Measurements for Fuel Performance Code Qualification 255
K. R. MERCKX (USA)

Assessment to the N47 Elastic Creep-Fatigue Rules by Means of a Computer Program 265
A. SALIM and A. J. DIXON (Great Britain)

Use of a Computer Model of a Nuclear Fuel Element (RAMPX2) to Predict Fission Gas Release for the 'D-COM' Problem 275
N. E. HOPPE (USA)

Ductile Creep Rupture in the Frame of Continuum Damage Mechanics . . . 279
EDWARD DUSZA and MAREK KOLCZUGA

Book Reviews 287

Number 4

Comportement d'un Biphasé à partir de Celui de ses Constituants: Méthode d'Eléments Finis Adaptée à la Traction de Matériaux Biphasés Equivolumiques 291
L. DURAND, P. PASTOR et P. COULOMB (France)

Analytical Determination of the Natural Frequencies and Nodal Line Patterns of Compressors and Turbine Blades 299
M. A. GHALIB and S. M. MAKKY (Iraq)

Discrete Memory Description of Strain Hardening and Softening with Application to Stainless Steel and Superalloy 315
S. HAN and B. WACK (France)

Creep Theories Compared by Means of High Sensitivity Tensile Creep Data . 343
A. SALIM (Great Britain)

The Application of Constant Strainrate Testing in Characterizing Creep Behaviour 361
M. STEEN, W. PROVOST and A. DHOOGE (Belgium)
